

Quick Start Package

Description

To get your system in action as soon as possible, order the Quick Start Package. This combination of training, consultancy and data migration will get your basic system up and running with minimal costs.

- Management call: Plan your implementation and what features of Manu Online ERP are needed in your company (1 – 2 hours)
- 3 training sessions: System administration 1 hour, basic business processes 2 hours plus manufacturing 2 hours.
- Data migration: You give your master data to us in a preformatted spread sheet; we make sure it goes into the system correctly.
- Online support: Key user support for the first 60 days.
- Follow-up analysis: Management call (1 – 2 hours) to evaluate how the start-up has succeeded and plan any future work.

Details

System administrator training

This 1 hour session is designed for the person who will be the administrator or key user of the system.

Subjects: User management, System settings, Principles of starting up the system

Online Startup training

The Manu Online consultant will guide you through the basics of the system in a two hour training session. After this training you are able to maintain item and partner information and manage the business process of the core system: sales to invoicing, but excluding manufacturing which is covered by a separate training module.

Subjects: System overview, login, basic use of screens and reports, Item Card for purchased items, Partner Card, Sales and Purchase Orders, Warehouse actions: Dispatch and Receive, Sales and Purchase Invoices and Payments

Online Manufacturing Training

In this two hour training session the Manu Online consultant helps you to understand Manu Online manufacturing concepts. After this training you are able to set up your product structures, open and execute work orders and follow the cost of production.

Subjects: Manu Online manufacturing overview, Item Card for manufactured items, Work Order creation and execution, Production Cost reporting
